Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Watts (6,367,804).

Watts discloses a variable bore ram packer 30 comprising an upper plate (top of 28), a lower plate (bottom of 28), plural wedge-shaped segments 34, and an elastomeric material 32. Each segment 34 has a top section 44, bottom section 46, and rib 48. The top and bottom sections include a straight edge with a step 60 and 62. The top section has an undersurface with a groove to receive the rib (seen best in Figs. 6 and 7).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Watts in view of McWhorter (5,294,088).

Watts does not appear to disclose an upper pin and bottom pin extending into recess in the upper and lower plates. McWhorter teaches a variable bore packer having an upper plate,

lower plate, plural segments, and elastomer material. As seen best in Figures 4 and 5, a pin 134 projects past the top and bottom sections of segments 70 and 80 and are received in recesses 132 in the upper and lower plates 54 and 56 (also see col. 9, lines 45-65). McWhorter teaches that this configuration allows the pin to limit and guide the motion of the segments. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the segments and plates of Watts with the pin and recesses taught by McWhorter to provide improved control of the segment movement.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
